

ENVIRONMENTAL POLICY

Management of That's Clean believes that businesses are responsible for achieving good environmental practice and operating in a sustainable manner. We are fully committed to reducing our environmental impact and improving our environmental performance as an integral and fundamental part of our business operating procedure. We encourage our customers, suppliers, staff and business associates to do likewise.

Policy:

Support and comply with all requirements of the current environmental legislation and codes of practise

Minimise our waste then recycle as much of it as is practical

Minimise energy and water usage in our buildings, vehicles and processes

Promote good recycling practices and encourage our clients to use bio degradable products

Strive for continuous improvement in respect of air, water and noise pollution

Where practical, purchase products and services that do minimal or no damage to the environment

Assess the environmental impact of any new processes or products we intend to purchase

Ensure that all our employees understand and conform to our environmental policy

Have appropriate emergency procedures in place to deal with spills, leaks or other situations that may have a negative impact on the environment

Investigate any complaints and or breach of our environmental policy and rectify the matter promptly to the satisfaction

Update our Environmental Policy annually in consultation with suppliers, clients and staff

WE ARE DOING OUR BIT FOR THE ENVIRONMENT

Cleaning Chemicals

We use locally produced chemical that are eco-friendly whilst still effectively cleaning and disinfecting. The range is branded with our own logo "Office protect hygiene".

Cleaning Cloths and Mops

We use colour coded micro fibre cleaning cloths and mops that require less chemical and less water. The correct use of colour coded cloths helps prevent cross contamination

Cleaning Operations

We strive to ensure that we do not knowingly cause harm to the environment in the course of our operations. We monitor our operations and ensure staff are trained effectively in order to ensure adverse harm to the environment is minimised or eliminated. Staff are trained to communicate with us any potential issues within the working environment that may cause harm to the site or the environment.

Consumables

We provide our clients with paper products manufactured from fully recycled paper and or from quantifiable sustainable processes.

Rubbish Disposal & Recycling

All rubbish generated during the cleaning process will be disposed of as per the instructions of our clients. We work with our clients to establish and maintain effective and responsible waste disposal systems. We can offer many ways to recycle your rubbish

Waste water generated during the cleaning process will be disposed of into the sewer system and NOT into storm water drains

Technology

Technology has allowed us to introduce an on line, client inter active Quality Control Process that simplifies the process and eliminates paper use.
